# TC-ME Series Hydraulic Compactors

*BTi's new TC-ME Series of Hydraulic Compactors are specially suited for installation on mini-excavators, expanding and enhancing the wide range of compaction applications and customer needs addressed by the TC Series of Hydraulic Compactors.*

## Features & Benefits

### High Performance with Minimal Oil Flow

The TC-ME compactors operate with minimal oil flow, leaving a sufficient amount of oil flow for boom movement throughout the compacting process.

### Mini-Excavator (ME) Mounting

Designed to fit a wide range of mini-excavators with the correct O.E.M. pin spacing.

### Force where it's needed

Rubber shock mounts are designed to isolate the vibration from the upper structure, allowing for the most efficient transfer of energy to the compaction job.

## Lightweight, Compact & Reliable

General Specifications	Unit	TC50ME	TC70ME
Impulse Force	lbs	3,000	5,000
Oil Flow Required	USgpm	8	14.5
Cycles/Minute	cpm	2,200	2,500
Operating Pressure	psi	2,200	2,000
Base Plate Dimension	inches	12.5x28	15x26
Base Plate Pressure	psi	8.57	12.8
Weight	lbs	295	550
Height	inches	27.5	30
Carrier Range	lbs	2,000-10,000	5,500-15,500
