CRACK ROCK DEMOLITION™

The ideal solution for small and large projects. Great for environmental location restraints and unaccessible heavy plant sites. Safe controlled demolition without explosives.

BENEFITS

- Increases productivity
- Increases safety
- Reduces labor costs
- Reduces pollution
- Reduces removal time
- Clean, efficient and cost effective
- Safe, environmentally friendly and gentle
- Non explosive
- Non impact
- Non flammable
- No transportation restrictions
- No vibrations, flying rocks or toxic vapors
- No noise
- No special training, equipment or licenses
- Provides access to areas where heavy plant or explosives are prohibited

Product Type temperature range for maximum performance

| | | | |
|--|--|---------------------------------------|---------------------------------------|
| Type 1 20 to 35C (68/95F) | Type 2 10 to 25C (50/77F) | Type 3 5 to 15C (41/59F) | Type 4 -8 to 5C (18/41F) |

PRODUCT DESCRIPTION

Crack Rock Demolition is the fastest, most powerful and economical expansive controlled demolition agent of its kind. It is made of a safe non-toxic powdered mixture of natural minerals. When mixed with water and poured into pre-drilled holes it will expand at an incredible force of over 20,000 PSI which is able to break any strength of rock or concrete.

APPLICATIONS

CONCRETE BREAKING

- Equipment pads
- Retaining walls
- Pillars
- Beams
- Foundations
- Patios
- Stair wells
- Driveways
- Roadwork

ROCK BREAKING

- Boulder removal
- Boulder cracking
- Excavation
- Trenching
- Leveling
- Tunneling

QUARRY & MINING

- Granite
- Marble
- Limestone
- Sandstone
- Onyx
