

O.T brand special point chisel for hydraulic breaker

# Chisel with extra hard core rod

Provide overwhelming strength with powerful engine performance

Advanced technology produces the high performance

## ● Exceeding durability

enhance the durability by pressing the special steel in the core of the fore head of the chisel.

## ● Exceeding tenacity

reduce the possibility of breaking by adding the materials of the function for increasing its tenacity.

## ● Exceeding heat-resistance

reduce the wear and tear caused by over-heating in the means of pressing good heat-resisting materials.

## ● High efficiency

increase your working efficiency due to its longtime unchangeable original shape kept by the friction situation changing of the interior and exterior of the drill rod with the special material being pressed in.

It's special and outstanding.  
Once you use, you will get it.

Comparison of the chisel with and without core  
(Data provided by O.T Brand)

**Example 1**  
● Diameter: 135mm  
● Item to be broken: hard granite  
● Time: 120 hours

Special point chisel 70mm

Standard chisel 275mm

The length of ware and tear is the difference of almost **3 times**

**Example 2**  
● Diameter: 105mm  
● Item to be broken: hard granite  
● Times to be used: 70 hours

Special point chisel 80mm

Standard chisel 265mm

The length of ware and tear is of **3.3 times**

**Example 3**  
● Diameter: 105mm  
● Item to be broken: hard granite  
● Location: Tunnel

Special point chisel 9 pieces for 900 m

Standard chisel 31 pieces for 900m

The above data clearly shows the special point chisel is much better than the standard chisel from their function and price comparison.
