# 55°–70°

## ONE SMALL CHANGE FOR YOUR MACHINE, A GIANT REVOLUTION FOR YOUR JOB

The way lies open for new angles that sharpen the job and create new possibilities. Olofsfors will do everything to help you make the leap to a more efficient job every day. This change is easy to achieve – just get the Olofsfors edge system and learn to master the full benefits.

Your future is somewhere between 50 and 70 degrees. And it's profitable, for sure.

### OLOFSFORS COMPLETE SYSTEM OF SHARP EDGES FOR GRADERS AND SNOW PLOWS IS NOW SHARQEDGES

---

REDUCED WEAR ON THE GRADER AND TIRES

REDUCED FUEL CONSUMPTION AND CO<sub>2</sub> POLLUTION

IMPROVED PLOWING/GRADING PERFORMANCE AND INCREASED PRODUCTIVITY

COMPLETE SYSTEM: ALL ROAD CONDITIONS, WINTER AND SUMMER, GRADER AND PLOWS

SELF-SHARPENING

IMPROVED OPERATOR ENVIRONMENT

QUICK MOUNT SYSTEM: LOW DOWNTIME AND HIGH FLEXIBILITY

# RUN SHARP. YOU ARE TRULY WORTH IT

## 55°-70° OPERATING TECHNIQUE

The SharqEdges operating technique – “Sharqing” - is to run with a selfsharpening edge angle and to cut and lift instead of scrape and push. It takes some training to operate a grader with SharqEdges – but it’s worth it. Grader operators familiar with SharqEdges outperform any operator using traditional thicker blades and techniques. SharqEdges equipped operators slice with the grader, like a knife through butter, achieving results that are truly a cut above the rest.

## THE SHARP QUICK MOUNT EDGE SYSTEM

Olofsfors SharqEdges is a sharp quick mount edge system for motor graders and snow plows. A complete toolbox of cutting edges for all road maintenance - winter and summer - and a way of working more efficiently. SharqEdges has many advantages over traditional thicker blade types for motor graders and plows. Instead of scraping and pushing the ice, snow or gravel, SharqEdges cuts, lifts and rolls the material off the road surface with far less downward pressure.

## QUICK MOUNTING

The SharqEdges quick mounting solution makes your operations faster and more flexible by minimizing the time needed to change edges. Any motor grader and most snow plows can be converted to SharqEdges. By mounting an adaptor plate on the grader mold board it is possible to quick mount any SharqEdges edge on to it. You gain access to a complete toolbox of reversible edges for all conditions and seasons.

### P300™ ORIGINAL

The unique and versatile universal edge that works in all conditions – ice, snow and gravel. It can be mounted as a front or underbody edge on motor graders, trucks and tractor plows.

### P300™ RUBBER

Has all the advantages of the P300™ Original but the holes are filled with rubber so that snow cannot pass through. It is a perfect choice for grading or plowing all type of white snow/ice packed roads.

### P300™ SLUSH

A two-in-one solution. Clears slush and light snow and can cut hard ice as well. Unique combination of sharp, hard teeth and cleaning flexible rubber. Perfect choice for slushy road conditions with hard ice underneath.

### FLAT EDGES OF500/OF600

Edge designed for graders and snowplows. The reversible design makes it most cost effective. This edge is an excellent choice for general grading, mixing and snow removal. The OF600 is very durable.

### VIKING SERRATED EDGES

Flat serrated super sharp long tooth ice edge provides ultimate penetration in all ice conditions.

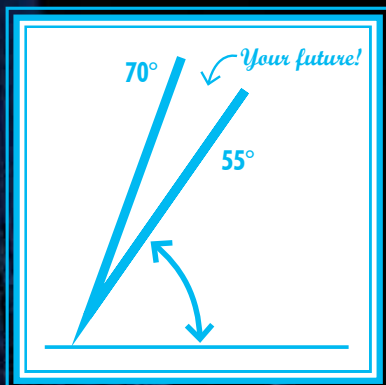

### HMS 3000™

Operates with a minimal contact area, allowing very low downward pressure on the edge. Comprises one solid piece with integrated support for maximum stability.

Keep your cutting edge sharp.  
And work more efficiently.

## BE SMART. RUN SHARP.

When the weather's is fighting furiously with everyone and everything. When you barely remember if it is morning or evening. That's when you really want to work smart. So you can cross off great jobs at the end of the day. Smile at lower fuel costs. Enjoy less wear on your gears. Work smart and stop cursing difficult blade changes. And get a warm "thank you" from your back and muscles after an extra-long working shift on the road.
